

# dr 3D filament Specification

## PVA Specifications

1kg Filament either 1.75mm or 2.85mm

Dimensional tolerance 0.03mm

Optimum printing temperature 180°C

Dissolves in water

Size of spool: Outer diameter 200mm

Height of spool 55mm

Packaging:

Each spool is hermetically sealed in an aluminium foil bag with silica gel. Additional cardboard packaging for protection in transit.

Storage:

Retain in foil bag with silica gel when not in use and keep in dry location at room temperature.

PVA will easily absorb water once opened therefore condition of material will deteriorate if not used after opening.
